

LABELED RESIN BOTTLE  
ABSTRACT OF THE DISCLOSURE

A labeled resin bottle containing a resin bottle and one or more labels placed thereon and fused therewith, wherein said resin bottle has a value of  $W/(V^{2/3})$  within a range from 0.1 to 0.5m, wherein W is a base weight, and V is a fill-in volume, provided that when the value is 0.1 or larger and smaller than 0.3, the bottle has a major thick layer consisting of a polyolefinic resin having a stiffness of 5,000 kgf/cm<sup>2</sup> or below, and wherein said label has a tensile elastic modulus of 5,000 to 30,000 kgf/cm<sup>2</sup>. The labeled resin bottle is capable of withstanding reduced bottle strength while thinning the resin bottle and reducing the amount of source resins used therefor.
